¹Typical evening speeds are based on the download and upload speed test results of existing customers between 7pm and 11pm and are subject to change. Actual download and upload speeds may be lower due to many factors including your network configuration, the location and type of content, the number of users simultaneously accessing the network, and the performance of third-party interconnection infrastructure that Superloop does not monitor or maintain. We will inform FTTP, FTTN and FTTC customers of their actual download speed once connected, and you will have the option to downgrade to a lower speed plan without penalties. Family Max, Creator, Lightspeed and Hyperspeed nbn are only available at FTTP and limited HFC technology locations. WIFI connected devices may have slower speeds than Ethernet connected devices.

²The speed tier figures in our advertising represent the maximum possible speeds available during off-peak periods. Please visit the ACCC website for further information on plan names (Standard, Standard Plus, and Premium) and what they mean at: <https://www.accc.gov.au/consumers/internet-landline-services/broadband-speeds>. Hyperspeed nbn available from 19.09.2025.

³This is a new NBN service and we do not yet have sufficient performance data to calculate the Typical Evening Speeds. Once sufficient data is available, we will update this information on our website.
